Introduction

Welcome to the Tempisque Comunidad User Manual, the digital platform designed to modernize and optimize internal management and communication between canton citizens and the ADESCO board. The fundamental purpose of this system is to centralize community reporting processes and the distribution of relevant information, ensuring that every alert or event reaches the right people immediately.

Through this application, citizens have access to interactive tools to report public service faults—such as water network problems or power outages—allowing them to capture exact coordinates using the device's GPS and attach photographs as technical evidence of the damage. Likewise, the platform provides access to a local events calendar where users can confirm their attendance, and a priority notice channel with unique sound alerts for emergencies. On the other hand, the administration module provides ADESCO with an advanced dashboard to track reports on an interactive map (Google Maps API), view usage statistics, and manage local activities efficiently.

This manual has been structured in a sequential and educational way to guide you step-by-step through every screen, button, and feature of the system. Whether you are a citizen reporting a problem or an administrator coordinating the community, this document will provide the necessary information to master the software quickly and easily.

Register a new account in the system:

1. Click on the sign-up button.
2. Fill in the required fields and click on the

Administration Dashboard:

Here you can see the following points:

- **Report Management:** view and track infrastructure problems reported by citizens in real time.
- **Events Calendar:** create, edit, and organize ADESCO community activities.
- **Alerts and Notices:** publish important notifications and emergency alerts for the entire community.
- **System Statistics:** monitor key indicators such as active users, received reports, and sent notices.

Reports Map:

Here you can see all the reports made by the system users, located in real time to facilitate their tracking and solution.

Steps to create a new event:

1. **Select the Category:** Choose the type of event by pressing one of the available buttons: *Reunión* (Meeting), *Comunitario* (Community), *Taller* (Workshop), or *Celebración* (Celebration).
2. **Enter the Title:** Type the descriptive name or title of the activity in the "Título del Evento" field.
3. **Add the Description:** Detail the key points, objectives, or requirements of the event in the "Descripción" box.
4. **Set Date and Time:** Select the exact day in the "Fecha" calendar field and define the time in the "Hora" field.
5. **Define the Location:** Type the specific place where the activity will take place in the "Ubicación" field.
6. **Finish the Registration:** Click on the **Crear Evento** button to save and publish the activity to the calendar, or click *Cancelar* if you want to discard the changes.

Steps to create a new notice:

1. **Click on the notice type:** Select a category by pressing the *Agua* (Water), *Electricidad* (Electricity), or *Evento* (Event) button.
2. **Type the title:** Click on the "Título" field and enter the name of the notice (e.g., Service suspension).
3. **Type the description:** Click on the "Descripción" box and write down the important details of the notice.
4. **Turn on urgency (Optional):** Click on the "Marcar como urgente" switch if it is a priority notification.
5. **Click on Crear Aviso:** Press the light blue **Crear**

User Dashboard - "Mi Comunidad"

Section: In this section, as a citizen, you can interact directly with your local environment:

1. **Look at recent notices:** Check important notifications about water, electricity, or events published by ADESCO in real time.
2. **Click on an event:** Press any activity on the calendar to see the full details (time, date, and location).
3. **Click on Confirmar Asistencia:** Press the light blue button on an event card to let the board know you will attend.
4. **Create a damage report:** Click on the reports button to alert about infrastructure problems, send your evidence photo, and share your GPS location.

Steps to report a fault:

1. **Click on the fault type:** Select the *Electricidad* (Electricity) or *Agua* (Water) button depending on the issue
2. **Type the description:** Click on the "Descripción del Problema" box and detail the situation with a minimum of 10 characters.
3. **Click on Obtener mi ubicación GPS:** Press the button to register the exact coordinates where the damage is located.
4. **Add photos (Optional):** Click on the *Agregar* box to upload up to a maximum of 3 evidence images
5. **Click on Enviar Reporte:** Press the light

Events Calendar - User Guide:

In this section, you can review and participate in the activities scheduled by ADESCO:

1. **Look at the week dates:** In the top bar, you can swipe and view the days of the month to plan your time.
2. **Check Upcoming Events (Próximos Eventos):** Scroll down to see the complete list of activities, where you will find the date in the blue box, the type of event, and the technical description.
3. **Consult key details:** Check the icons on each card to know the exact time the location, and how many interested people are registered.
4. **Click on Confirmar Asistencia:** If you plan to attend, press the light blue **Confirmar Asistencia** button to secure your spot and notify the board of directors.

Conclusion

In conclusion, this manual provides the necessary guidelines to ensure the optimal and efficient use of **Tempisque Comunidad**. By centralizing citizen reports and the distribution of ADESCO notices, this platform becomes a key technological tool to strengthen transparency, improve response times for infrastructure issues, and foster active participation. We trust that the adoption of this system will mark a steady step toward digital development and the secure organization of our locality.
